Join community groups rallying and marching against the third US-led war on Iraq in 25 years. Launched on August 8, 2014, the US' "war on ISIS" has included thousands of bombing runs and untold deaths of civilians in both Iraq and Syria. The US continues to bomb and send more "advisors" despite the lack of an Authorization for Use of Military Force. At this event, we will also connect the war to police brutality and racism in the US. As Rodney King was beaten brutally by LA Police a few days after the end of "Gulf War Part 1" in March 1991, young Michael Brown was killed in Ferguson, MO the day after the US re-launched its war in Iraq. The war comes home, again.
